

/home/user/bayes-filters
-lib/src/BayesFilters/include
/BayesFilters/any.h

```
graph TD; A["/home/user/bayes-filters<br>-lib/src/BayesFilters/include<br>/BayesFilters/any.h"] --> B[algorithm]; A --> C[memory]; A --> D[stdexcept]; A --> E[typeinfo]; A --> F[type_traits];
```

The diagram illustrates a header file's dependencies. A central box at the top contains the path `/home/user/bayes-filters-lib/src/BayesFilters/include/BayesFilters/any.h`. Five arrows point downwards from this box to five separate boxes below it, each representing a standard library component: `algorithm`, `memory`, `stdexcept`, `typeinfo`, and `type_traits`.

algorithm

memory

stdexcept

typeinfo

type_traits
